

## JD Edwards Developer

J.C. Newman Cigar Co. was founded in 1895. With our headquarters, factory and museum located in historic Ybor City (Tampa), Florida, J.C Newman Cigar Co. is the oldest family-owned cigar manufacturer and distributor of premium cigars in the country and operates the last cigar factory in the Cigar City of Tampa.

The JD Edwards (JDE) Developer will join the IT team and become an integral part of the advancements in our current JDE E1 environment.

Reporting to the IT Manager and working closely with the management team, the JDE Developer will work to enhance JDE program functionality to align with business processes, resolve issues and provide top level support for day-to-day information activity in a timely manner. This position is critical to the business operations and provides our users with application and technical assistance in their daily activities of supporting Sales Orders, Inventory Management, Accounts Payable, Accounts Receivable, Purchasing and General Ledger. While the IT team members each have their own specialized skills and responsibilities, the team also collectively assists with the various technology duties which support the company's IT needs for both in-house and remote employees. The ability to learn and support other areas of our department is another aspect of this position.

### **The Essential Duties, Functions and Responsibilities are as follows:**

- Provide functional and technical support for JDE Enterprise 1 software and users.
- Monitor JDE logs and perform routine maintenance for JDE Servers and Databases.
- Analyze, design, and develop custom menus, reports and enhancements related to JDE.
- Assist with projects related to JDE and supporting software including functional, technical, and budgetary reporting.
- Train new and existing users on JDE operations or modifications and upgrades
- Support IT Helpdesk with inquiries related to JDE and provide after-hours and on-call support when needed.
- Work with the IT team to resolve problems related to JDE technical issues and recommend solutions.
- Assist with configuring JDE to fit current and future business practices.
- Perform unit testing to ensure applications and processes are working as expected.
